

SANDIP FOUNDATION'S
SANDIP POLYTECHNIC, NASHIK
DEPARTMENT OF ELECTRICAL ENGINEERING

Name of Project: “RELAY BASED MULTIFUNCTIONAL EARTHING”

Name of Project group Members

1. Nitiraj R Mahajan
2. Saurabh A. Pardeshi
3. Tejas A. Bhagwat
4. Pradyumna P Patil

Description: As the name says ‘Relay Based Multifunctional Earthing’ the function to be executed in the concept is on relay bases. The aim of the project is to get the maximum efficiency by the earthing. For which we have made a done lot of modification in traditional types as plate and pipe earthing. In which the resistance between earth and plate will be minimum which make the earthing more efficient

Awards/Recognition:

Third year student of Electrical Engineering Department Nitiraj Mahajan,Tejas Bhagwat,Saurabh Pardeshi won first prize in National level Project competition at “AAYAAM-2018”
